Work Experience

Freelance Developer

Alesti Systems - Houston, TX

January 2018 to Present

- Architected mobile sales, marketing, and analytics platform along with content management systems.
- Engineered backend systems to maintain and support SaaS application that provided each client with an application/database server cluster.
- Developed universal push notification platform for APNS (Apple) and GCM (Android) networks that featured user targeting, schedulable notifications, and reliable performance.
- Constructed analytics platform to track API usage and user behavior with integration into an online dashboard.
- Managed traffic and designed and created MySQL databases for hundreds of concurrent users.
- Implemented PayPal & Braintree integration, including subscription services.
- Beta-tested pre-release application software
- Provided 1-on-1 technical support via email and phone, and in person
- Performed on-site software maintenance for end users
- Refactored old code to be more readable and manageable.
- Communicated with clients to deliver quality software projects and followed up with them to ensure that the customer was happy with the work.

Systems Administrator

Transcore - Houston, TX

January 2017 to May 2019

- Engineering of SA-related solutions for various project and operational needs.
- Install new / rebuild existing servers and configure hardware, peripherals, services, settings, directories, storage, etc.
- Install and configure systems such as supports GIS infrastructure applications or Asset Management applications.
- Build scripts to speed up configuration processes in Windows and Linux environments
